

EX NIHILO

Visions

Autoprod. cd-9tx-35'

This album is great and I liked it since the first listen. The Ex Nihilo music is a blend of electro, goth, ambient and industrial. All the songs, since the first introductive La Survie De L'esprit (a 81' second long track that with its dark bells resume very well the atmospheres of this CD), are very catching and inspired. Météores for example has got great moments with its dark ambient sounds with a distant voice, while Chase (a Moroder's song that I wasn't aware of) it's a great dance synthpop track with a touch of dark tunes. An album that won't disappoint the electronic and the gothic music lovers, with its great obscure atmospheres.
