

## DARKLIFE EX NIHILO « Maladie Mentale ».

Maladie Mentale introduces you to the new way of Ex Nihilo , as the project has split in three now. While the main name carrier Ex Nihilo will remain an electro-industrial project, Cogito will produce dark ambient and Cicérone will cater for trip hop fans. The music is more dark and industrial minded with a strange dark distorted voice although there are less lyrics on this album than on previous ones. In spite of the clear turn of the key, when compared the last album Visions , Maladie mentale is still less harsh and hard than other industrial acts. The music has more harmony and sound structures and is easier to listen to. Some songs I like are Voyage à l'intérieur du cerveau, Pierre de tonnerre, Les chambres du cerveau, Psychotique ans especially Des espoirs. The Swiss artist Laine manages to crank out different songs to match different moods
